

Instructions for Setting up the Graphics Programs

The BigInstall_build14 contains the GDOTData14_Setup.exe to install the following GDOT Bridge Graphics Files.

****Rename the file to **GDOTData14_Setup.exe** ****

It is a self-installer file that uses the **C:\GDOTData** folder and installs;

Concrete Bent, Deck Sections, Pile Bent, Bridge Notes

(the Bridge Notes program uses Editpad.exe to open and read the files it uses)

It also places the Icons for the programs on the Desktop with an “8” imbedded in the logo to distinguish the program from the V7 version that may be on the desktop.
